**Store Number**
NJ-0778

**TDX Tech Work Order**
**Tip:** Use this order to check in with TDX Tech help desk
159426

## Full Work Description

If technician has any questions regarding the work order, contact the TDX Tech help desk at 218-216-0387. Any reference to the contact the help desk refers to the TDX Tech help desk. The technician is not to reach out to the customers help desk directly unless instructed to.

Any additional expense requests other than materials used, such as travel, must be negotiated or requested as part of a counter offer prior to tech assignment.

Our client has contracted TDX Tech to dispatch techs to their agent locations to update their PCs to the current version of the client software.

***You must bring a valid US Government issued ID to you to each site as verification that you are the tech we told them would be arriving to site.***

It is not required that you speak Spanish for this work order but there is a good chance the location contact will only speak Spanish. Therefore, be sure to bring the documentation required as we have translated the authorization and refusal letters into Spanish for the agents.

In the event you are refused, then you will need to leave a copy of the English and Spanish refusal letters and take a picture of the front of the building showing the location name.

***Please note that the quantities of PC swaps and updates that we have provided to you are based on the data that we have received from the client. We have found that these quantities are not always correct. Be sure to spend the first few minutes on site identifying all PCs on site that run the client software and which of the below scenarios they will fall into for the update. If you have questions as to what exactly needs to be done at the site please call back to TDX Tech and we'll help you identify.***

**Detailed Scope:**

**Prior to Arrival - Print the following documents to bring to site:**

- English and Spanish Authorization Letters
- Print 1 of each that you can bring to each site to show in the event the agent is not sure what you are there for
- English and Spanish Refusal Letter
- Print 1 of each per location that you can leave with the agent in the even that you are not allowed to do perform the work needed at the location by the agent
- TDX Tech / Client Work Order
- Print 1 per location to have signed by the agent and yourself upon completion
- This is a required deliverable you must return 1 of these for each location you complete

- 3100017 and 310018 PC Upgrade Instructions
- Print 1 of each for instructions on how to swap the PCs

Upon arrival call 218-216-0387 to check in and out with the TDX Tech helpdesk.

- We will provide you with the tracking numbers and Serial numbers for the PCs.
- These are used as verification that you are three on behalf of TDX Tech.

There are 3 possible scenarios for updating PCs at these locations. The tech will be completing 1 or more of the possible scenarios at each location. The quantity and type of scenarios to complete for this location can be found in the custom fields of the work order.

***Scenario 1 - Client Owned PC Swaps***

- In this scenario the technician will be swapping an existing pc with new WIN 10 PC. The equipment will be shipped to location, technician is required to pack legacy PC and leave on site with the agent to be returned at a later date.
- Installation instructions are attached to the work order
- If the scheduled technician is NOT the technician doing the install then TDX Tech must be notified prior to site arrival with the technicians name and contact phone number. If this isn't communicated properly the agent may refuse the installation and TDX will not pay for the work as we are required to provide the name of the technicians going to each location to the client ahead of time.
- De-Install Legacy PC
- ***The legacy PC in this scenario should be a thin client very similar to the one that was send and it should have a client sticker on it.***
- Install new PC per instructions
- Client owned PCs will have the sticker with the Client Logo on the actual PC
- Call client tech support for PC activiation
- This process will take 20 to 40 minutes per device
- Take a picture of the new PC install, powered on and after the activation has been completed
- Pack Legacy PC into packaging the new PC arrived in
- Take picture of legacy PC packed and ready for return
- At no time should technician remove equipment from the location.

***Scenario 2 - Agent Owned PC Swaps***

- In this scenario, the process is similar to scenario 1 but the agent actually owns the new and old PCs.
- ***The new PC will not have the sticker with the client logo on the PC so that is how you can tell if it's for client or agent owned.***
- ***The legacy PC in this scenario could be any type of PC, but it will not be up to the standards/specs to just get the update (Scenario 3).***
- **Since the PC is owned by the agent you will not be shipping the PC back.**
- You will be replacing an existing agent owned PC.
- We are not required to transfer any files from the legacy PC to the new PC
- If the legacy PC has a report printer connected to it then we should attempt to install the printer on the new PC
- Installation instructions are attached to the work order
- If the scheduled technician is NOT the technician doing the install then TDX Tech must be notified prior to site arrival with the technicians name and contact phone number. If this isn't communicated properly the agent may refuse the installation and TDX will not pay for the work as we are required to provide the name of the technicians going to each location to the client ahead of time.
- De-Install Legacy PC
- Install new PC per instructions
- Client owned PCs will have the sticker with the Client Logo on the actual PC
- Call client tech support for PC activation
- This process will take 20 to 40 minutes per device
- Take a picture of the new PC install, powered on and after the activation has been completed
- If there is room for the legacy PC to remain installed they can keep it in place; otherwise just give the legacy PC back to the agent as they own it.
- At no time should technician remove equipment from the location.

***Scenario 3 - Agent Owned PC Updates***

- In this scenario we will not be swapping out any PCs but only updating the client software on agent owned PCs that currently run the client POS.
- Similar to Scenario 2, the agent owns the PC, but in this scenario we will not replace the PC because it meets the system requirements.
- We will need to confirm the PCs meet the following system requirements:
- Memory - 8GB
- Processor - i5 or better
- OS - Window 10
- Resolution - 1280x1024
- If the minimum requirements are met then tech should call the client tech support for the software update
- This should take 20 to 40 minutes

- Take a picture of the PC after the update has been successful

**This installation CAN NOT be rescheduled. The location has a strict deadline to meet, if you can not meet the installation date DO NOT apply for this work order.**

**Time Onsite: 1 Hour Per Device average**

**Compensation / Pay:** An Expense Will Be Added After Completion of Installation To Cover Additional Compensation. Prior to Payment Approval.

***Base - $75 fixed & $50 per additional WIN 10 PC installed or updated.***

***Please keep in mind that the number of PCs listed on the WO is an estimated number and may fluctuate. Technician will only be paid for the total number of PCs that were updated and swapped on the day of install, not the number that is provided on WO.***

*Any troubleshooting onsite time over 1.5 hours per device will be billed hourly @ $50/ hour. Technician MUST contact TDX to record issues, troubleshooting time and delays with details on what steps were taken during troubleshooting. The hourly rate will only be paid on a rare occasion that a technician will need more time on site for troubleshooting. Contact TDX Tech help desk with any questions.*

- ***IF store manager REFUSES to complete installation, technician will hand over refusal letter, take a picture of the front door and leave. The TDX work order will close in the amount of $75. Contact TDX to go through check out procedures.***
- ***IF the location is not ready for the installation or asks to reschedule, you will contact TDX Tech to provide update. Take a photo of the front door and if willing, have the agent sign your work order. The TDX work order will close in the amount of $75. Situations could be where:***
- ***IF agent refuses installation due to technicians name not being properly updated prior to installation the WO will be closed out for $0. As the installation will need to be rescheduled.***

*Technician must keep and provide receipts for all parking or toll expenses for payment approval.*

**Travel Pay: If the expense is not approved during negotiation, the travel cost will not be approved.**

**Qualifications:**

-Knowledge of Windows systems (WIN updates, Java Updates, Deleting and Reloading Drivers)

-Troubleshooting Software Skills

**Tools Required:**

-Basic PC Tool Kit

-Digital Camera

-Reliable Vehicle

-Patch Cables

Technician is required to supply all tools and materials needed to complete the installation. If the technician does not have the skill set, tools, or materials needed, DO NOT accept the work order. If the technician arrives on site and is not prepared, they will be asked to leave site and will not be paid.

## Tasks

Some tasks below may be eligible for completion by calling 1-877-573-6330

**Pre Visit**

1. Provider must set start time

**On Site**

1. Provider must check in

**Post Visit**

1. Provider must check out
   (Code 119 882 856 949 9#)
2. Provider must enter close out notes

## Approval of Work

I acknowledge that the work has been satisfactorily completed.

## The following information is confidential and should not be seen by anyone but you, the assigned provider.

### Confidential Information

Client is Intermex

Client Tech Support # - 888-544-4085

**Work Description**:

1. Check-in with Helpdesk at 218-216-0387
2. Check-in with site manager on duty and provide store manger with authorization letter and photo ID.
3. Locate equipment needed for install.
4. Perform swaps and software upgrades per instructions
5. Pack legacy PCs
6. Take all required pictures
7. Complete Testing of All Equipment.
8. Have site manager sign your work order - provided at the end of the installation guide.
9. Check-out with Helpdesk at 218-216-0387

**Technician is representing TDX Tech on BEHALF of Intermex while on-site.**

Technician will be required to look professional while on site, wearing a polo or button down shirt with no logos, slacks or nice jeans, and no hat. TDX Tech is under strict instructions to look and act professionally. Any customer complaints from this perspective will result in a decrease in pay.

Technician will be required to bring all tools. These will also be listed in the Tool Requirements section of the installation guide.

While on site the technician is not to mention any other company. If you do, you may not be allowed to complete the installation.

Technician is required to contact TDX Tech Help Desk at 218-216-0387 to check in and out. Failure to check in and out will result in a negative rating and possible decrease in pay.

-Submit pictures and documents to docs@tdxtech.com

-If the technician does not submit all deliverables, the work order will not be paid.

-Payment for time on site accounts for when the technician checks in and out with the TDX Tech help desk.

-If you reach the voice mail, make sure to leave a message with your TDX WO # and the reason for the call. A member of our helpdesk will contact you back as soon as possible.

If the technician has any questions, they are required to contact the help desk at 218-216-0387. If you need assistance, the help desk will contact the customers held desk. Only with permission from the help desk should a technician contact the customer help desk directly.

If for any reason the technician will be late, you must contact the TDX Tech Help Desk at least 1 hour before appointment time to notify that you are delayed at 218-216-0387. If you will not be able to perform the work order, you must call the TDX Tech Help Desk at least 24 hours in advance. Anything less that 24 hours in advance will be considered a back out and a negative rating will be given. We are providing schedules to the end user who is basing their tech support scheduling on, and thus, we must maintain the schedules that we give them.

Technicians will be required to bring all documents to the site with them. If you do not bring all required documents, you will be sent to obtain a copy and return. You will not be paid for the time it takes you to obtain the them.

**----------**

**----------**

Any reference to the Help Desk refers to the TDX Tech Help Desk. Technician is NOT to reach out to the site or the customer.

If you run into any issues, or have any questions, call the TDX Tech Help Desk immediately at 218-216-0387. Do not leave site with any outstanding issues.

If the technician will not be able to complete the work order, they must contact the Help Desk 24 hours before the scheduled install time at 218-216-0387. Failure to do so will result in the technician receiving a negative rating, being blocked by all future TDX Tech work orders and the work order will be escalated.

## Deliverable Uploads

Make sure you collect and upload any required deliverables into the following deliverable categories:

## Customer Policies & Procedures

**COVID-19 Policies and Procedures for TDX Tech Field Engineers and Technician Partners**

TDX Tech's ongoing commitment to our partners means implementing new policies and procedures to protect the health and safety of the general public, all employee's, contractors, and end users. We find ourselves in unprecedented times and must adjust our behaviors for the well-being of one and all. This document details our expectations and provides guidance for our field engineers and partners.

By accepting this work order, you are acknowledging and assuming the risk to yourself and to others of your contraction and of your transmission of COVID-19 related illnesses. Compliance with these policies and CDC Guidelines does not guarantee your safety. Your health and safety rests in your hands and the care that you take while in the field. The intention of these policies is to mitigate and control these risks with regards to the spread of the Coronavirus and prevent infections. We are reliant on your adherence to the policies and procedures, and we encourage you to go above and beyond what has been detailed. We encourage feedback and will update policies as needed based on the most current information. Thank you for your continued support and partnership.

Updated TDX Tech Technician

COVID-19 Policies:

• All technicians must adhere to the following policies:
o You have all PPE and cleaning supplies detailed in the required materials list of the work order.
o You have no symptoms of illness listed by the CDC including but not limited to:
? Fever
? Cough
? Shortness of breath or difficulty breathing
? Chills
? Repeated shaking with chills
? Muscle pain
? Headache
? Sore throat
? New loss of taste or smell
o If any symptoms arise you will immediately contact TDX Tech.
? No negative actions will be taken for illness related cancellations or postponements.
? We request that you also notify again upon being symptom free or receive a negative test so we can start the clock on allowing you to go back to work.
o You will follow all federal and local guidelines and directions regarding social distancing and safe work-place interaction.
o You are the tech performing the site visit and no persons other than you will be brought to site.
? If you are not the technician that will be on-site, TDX Tech needs to be notified at least 48 hours prior with contact info and name of tech. That tech will need to be given TDX Tech Policy and Procedures document to review.
? No assistants may be dispatched without prior approval from TDX even if you are not charging for the labor.
o No technician changes may be made within 48 hours of scheduling unless the assigned technician is showing symptoms.
• All Technicians must provide, stock, and wear Personal Protective Equipment while in the field.
o TDX requires any field engineers onsite to be wearing face covering equipment (mask or gator with at least two layers).
o TDX Tech also recommends and encourages protective eyewear, latex gloves, long sleeved shirt and pants, but these are not requirements.
o These items will be listed in your required materials list for all work orders for the foreseeable future.
• While onsite you will maintain a distance of 6 feet from other persons whenever possible.
• All Technicians must sanitize surfaces before and after contact.
o You will be responsible for providing sanitizing spray or wipes along with a garbage bag to contain the refuse.
? Please adhere to the directions on your product to disinfect the surface, generally this is 2-3 minutes of being visibly wet.
o Do not sanitize pin pads or other touch screen equipment which may be susceptible to cleaners.
? Please clean with a damp cloth and change PPE after contact.
• In the event that you go to a site and find that somebody in the facility is showing symptoms, and you do not feel comfortable working in the environment, please notify TDX Tech immediately.
o We will quickly work to notify the customer that we will not be able to complete the work as scheduled.
o No negative consequences will be implemented as long as the incident can be verified.
• You may also be required to have your temperature scanned to verify that you do not have a fever.
o This is customer specific and may not always be required.
• All Technicians will act in good faith and adhere to the policies and the spirit of the policies.

Required Materials and Supplies:

• Cloth face mask or gator with at least 2 layers (reusable face coverings must be disinfected)
• Disinfecting wipes or cleaning solution
• Fresh paper towels
• Garbage bag for all soiled refuse
• Bar or jar of hand soap or hand sanitizer above 60% alcohol concentration

Recommended Materials and Supplies:

• Protective eyewear
• Water for washing hands in the event the site doesn't have running water
• Long sleeve shirt and pants
• Box of disposable gloves (nitryl or vinyl - not latex)

Enforcement:

Adherence to these policies and procedures is a requirement. Failure to adhere to any policy will result in non-payment of work and is at the discretion of the Project Manager in charge of the client. Violations include but are not limited to; failure to bring appropriate tools or

supplies, unexpected or unknown techs onsite, misinformation, failure to respond within the timeframe provided, or any other reasonable violation based on the judgement of the Project Manager in charge. Additional actions may be taken at our discretion.

Mitigation:
If you are diagnosed with COVID-19 you must contact TDX Tech immediately. If you are properly following policies all the surfaces you touched should have been actively disinfected, if this was not the case you must let us know so we can take appropriate action. Confirmed cases of COVID-19 must follow the return to work guidelines provided by the CDC. This includes a 14-day quarantine from the onset of symptoms or a positive test or 7 days of quarantine after receiving a negative test. Full information can be found at ( https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/quarantine.html ). Please let us know when you have recovered and do not relax the steps you are taking in the field.

Contact Us:
You can reach TDX Tech at projectteam@tdxtech.com and should reach out to the project staff who contacted you regarding the job if you have any questions about our policies and procedures.
