Technician Job Notes [required]

Full Work Description

WE ARE WORKING TO IMPROVE THE APPROVAL PROCESS TO EXPEDITE PAYMENT. HERE IS WHAT IS NEEDED TO APPROVE THE WO:

- All Deliverables provided and approved while onsite upon Check Out

- A proper BEFORE picture of the audio stack (Amplifier, Zone Controller, Media Player) showing all existing connections

- Completed WO (Tasks, Closing Notes, Expenses submitted, Check In/Out, etc)

IMPORTANT: Contact Worldlink immediately (DO NOT wait until checkout) should your SOW change once on site, or if you face any challenges out of your control that may affect your total time spent on site (delays, access issues, etc.). Failure to do so may result in non-payment for the associated challenges/changes.

Tech Skillset:

- VoIP Equipment
- Paging Equipment
- Communication Skills
- Follow Directions

Required tools/equipment:

- Basic hand tools
- **Ensure you have a small enough flat-head screwdriver for unscrewing/screwing speaker terminal blocks**
- Laptop, with Ethernet port
- Cisco Console Cable
- Electronic Label Maker
- 8 - 10' Ladder

Required Materials (Provided by Technician - included in the fixed pay):

- (2) 5' CAT6 Patch Cables - White
- Velcro strips / Tie-wraps

High Level Overview

- You will be swapping a total of **2** Cisco phones with new Poly Voice E220 phones. These phones are located throughout the store, as shown below
- **Manager's Office:** 1 phone(s)
- **MAC Address:** 0.0
- **Grooming:** 1 phone(s)
- **MAC Address:** #NO MATCH
- **Please note: there is a chance the phone you're installing is meant for the OTHER location than what is indicated here. Always double check the assigned location indicated by the phone itself once installed**
- You will also be swapping out the existing **Zone Controller** located in the **Manager's Office**
- **MAC Address:** #NO MATCH

Upon Arrival in at the Store:

- Check in with Worldlink Dispatch (210-756-8651)
- Check in with the **Store Manager**
- **Work with the Store Manager to locate the shipment of phones and paging adapter previously sent to the store**
- Inventory the received equipment and ensure the quantity of phones received **AND THE MAC ADDRESSES** match the information provided in the **"High Level Overview"**section
- If there are no MAC addresses listed in the "High Level Overview" section, validate quantity received and**immediately** upload pictures of the sticker containing the MAC address to your Work Order
- **If the quantity does NOT**match, inform Worldlink immediately

SCOPE OF WORK

Task # 1 – Locate the existing Zone Controller

- Work with the Store Manager to locate the Zone Controller
- The existing Zone Controller is manufactured by **"Advanced Network Devices"** and will be labeled as such. It is usually located on top of or nearby to the audio stack
- **This SHOULD be in the Manager's Office alongside the other audio equipment *(music player, amp, etc)***
- If you cannot locate, check the backroom/receiving area, next to the network rack
- Refer to the "Old Zone Controller" attachment for reference if you need help identifying

Task # 2 - Capture details of the existing setup

- Before starting any work, you must take several photos of the existing setup, and send them to the Worldlink Engineer.**This benefits you, as the Engineer will review and provide guidance**, and will also make rolling back easier (if required)
- Ensure the pictures are clear and easy to interpret, and clearly show the following connections
- Speakers, from wall to amplifier
- Zone Controller to amplifier
- Mood Media player, to amplifier
- Amplifier to amplifier (if applicable)
- **Text the pictures to the Worldlink Engineer:9714136479**

Task # 3 - Install new Algo Paging Device

- The new Algo Paging Device will need to be connected to the store's existing audio setup. It will **replace** the existing Advanced Network Devices box you located in **Task # 1.**
- **The existing** device is connected to one or more amplifiers via an RCA cable. **You will re-use this cable to connect the new Algo device.**
- There is a document attached to your Work Order called "Algo Wiring Guide".
- There are 3 pages to this document, each showing a different possible configuration.
- Find the page that matches your particular configuration, and follow the instructions to install the new Algo device.

- If you're unable to locate or are unsure, please reach out to Worldlink for assistance
- **You should not make any changes to the amplifier connections unless instructed to by Worldlink**
- Once you have the Algo device connected, connect it to the network using the existing Ethernet cable and validate that it connects successfully
- The blue status lights on the front will turn on and **remain on until the device has fully powered on**

Task # 4 - Test new Algo Paging Device

- Before testing, check to ensure you can hear overhead music playing through the speakers
- If you can't, ask the MOD to check that the speaker volume is turned up for the room you're in
- **If the volume is turned up and you still can't hear music, escalate to the Worldlink Engineer for assistance**
- Once the status lights on the front of the device switch off, press the "Reset" button on the front of the unit**briefly** and the unit will announce its IP address over the overhead speakers.
- If you still hear overhead music or now nothing at all, check your wiring connections and escalate to the Worldlink Engineer for assistance -**9714136479**
- **You must be able to hear the IP address being read out over the speakers before continuing to Task # 5.**
- **Press the "Reset" button a second time to stop the read out**

Task # 5 - Contact Petco NOC to configure Algo Paging Device

- Confirm with the Worldlink Engineer that the Algo device is connected correctly, and that you successfully completed the testing in **Task # 4**
- **You will then be provided with a Phone # to call**

***** DO NOT PROCEED TO TASK # 6 WITHOUT FIRST GETTING IN CONTACT WITH THE PETCO NOC *****

Installing the phones before getting approval from the NOC will**not** save you time, it will only add additional delays

Task # 6 - Replace Cisco Phone(s)

- Work with the Store Manager to locate each of the phones to be replaced
- **For each phone…**
- Identify the Cisco phone to be replaced
- Make note of the Line the phone is assigned to
- Where this is displayed will vary depending on the model of phone
- **Examples**: MANAGER, GROOMING, Vet 2
- Make note of any existing data connections / “daisy-chained” devices
- Each phone will have at**least** 1 connection providing data and power to the unit
- **Some** units may have a second connection to a nearby workstation or printer
- **Disconnect** the Cisco phone and put it off to the site
- **Unbox** the new Poly phone and assemble ***(see assembly guide attached to your Work Order)***
- To determine **WHICH** phone to install, compare the MAC address against the locations listed in the **"High Level Overview"** section
- If there are no MAC addresses listed, pick one of the phones. After it boots up it will display either "Customer_Service" or "Grooming" on the screen. If that does not match the location you're installing, swap it with the other phone.
- ---
- Install the desk stand
- Install the handset
- **Connect** the new Poly phone to the existing data run
- There are **two** RJ-45 jacks on the back of the phone. The port on the**left**connects to the wall, and the port on the**right**connects to **a “daisy-chained” device** (if applicable)
- **Validate** that the phone powers on and is receiving a network connection
- **!!!** If prompted to set a password, use the **Store Number** (add a leading zero if the Store Number is only 3 digits - ex. Store #123 would be **0123**)
- Once online, the display of the phone should indicate which location this phone is assigned to ("Customer_Service" or "Grooming"). If that location doesn't match where you're currently installing the phone, swap it with the other one.
- If the phone comes up and does not display the Store # and location ("Customer_Service" or "Grooming"), unplug the phone for 10 seconds and plug it back in
- Once you have validated that the phone is fully functional, move on to the next phone
- **** Take a picture of the phone, screen, and MAC address sticker prior to moving on. This is one of your deliverables**
- **** If there was an additional device daisy-changed to the phone (workstation, printer), validate functionality with the Store Manager**
- **Remove** the old Cisco phone from the site and dispose of properly

Any time spent waiting for support, troubleshooting, or otherwise performing work outside of the scope outlined above must be documented and immediately reported to Worldlink for approval

Final Tasks

- Clean areas affected by your work
- **Pack up the old paging device and give to the MOD**
- **Pack up the old Cisco phones and take with you for disposal**
- Check out with Onsite POC
- Upload collected deliverables and Enter Closing Notes to the WO prior to departure
- Check out with Worldlink for deliverables review and release from site
- Must report all additional costs, if any, during the checkout call.

Required Photos/Deliverables (must be uploaded and verified by Worldlink Coordinator prior to leaving site)

Pictures -

- **Picture** of the **full audio-stack** (Zone Controller, Music Player, Amp)**prior** to swapping the Zone Controller
- Picture of the audio stack, showing the connection from the amplifier to the speakers
- Picture of the audio stack, showing the connection from the ORIGINAL Zone Controller to the Amplifier
- Picture of the audio stack, showing the connection from the Mood Media Player to the Amplifier
- Picture of the audio stack, showing the connection from one Amplifier to the other (if applicable)
- **Picture** of the **full audio-stack** (Zone Controller, Music Player, Amp)**after** swapping the Zone Controller
- **For each phone…**
- **Picture** of the**Cisco phone prior to removal**
- **Picture** of the**screen of the Cisco phone prior to removal**
- **Picture** of the **MAC Address sticker on the Cisco phone**
- **Picture** of the**Poly phone once installed**
- **Picture** of the**screen of the Poly phone once installed**
- **Picture** of the **MAC Address sticker on the Poly phone**
- **Picture** of the**signed and dated** checklist

Check In/Out & Escalation Process:

- Contact Worldlink Coordinator with the following information when arriving on site as well as prior to leaving (once all deliverables are uploaded)
- Store **#**
- Tech Name
- Work order **#**
- If any issues come up on site (missing equipment, access issues, site not ready, etc..) - contact Worldlink Coordinator immediately

Worldlink Contact: (210-756-8651)

Tasks

Some tasks below may be eligible for completion by calling 1-877-573-6330

Pre Visit

1. Provider must set start time

2. Provider must **Map out the site location to determine route to arrive before or at the scheduled time**
   (Code 135 126 405 910 63#)

On Site

1. Provider must check in

2. Provider must **Checked In (call) with Worldlink (210-756-8651) Prior to starting work**
   (Code 112 120 592 910 63#)
3. Provider must upload or take a picture of **Picture of the full audio-stack (Zone Controller, Music Player, Amp) prior to swapping the Zone Controller**

4. Provider must upload or take a picture of **Picture of the audio stack, showing the connection from the amplifier to the speakers**

5. Provider must upload or take a picture of **Picture of the audio stack, showing the connection from the ORIGINAL Zone Controller to the Amplifier**
6. Provider must upload or take a picture of **Picture of the audio stack, showing the connection from the Mood Media Player to the Amplifier**
7. Provider must upload or take a picture of **Picture of the audio stack, showing the connection from one Amplifier to the other (if applicable)**
8. Provider must upload or take a picture of **Picture of the full audio-stack (Zone Controller, Music Player, Amp) after swapping the Zone Controller**
9. Provider must upload or take a picture of **Picture of Cisco phone [#1] prior to removal**
10. Provider must upload or take a picture of **Picture of the screen of Cisco phone [#1] prior to removal**
11. Provider must upload or take a picture of **Picture of Poly phone [#1] once installed**
12. Provider must upload or take a picture of **Picture of the screen of Poly phone [#1] once installed**
13. Provider must upload or take a picture of **Picture of the MAC Address sticker on Poly phone [#1]**
14. Provider must upload or take a picture of **Picture of Cisco phone [#2] prior to removal**
15. Provider must upload or take a picture of **Picture of the screen of Cisco phone [#2] prior to removal**
16. Provider must upload or take a picture of **Picture of Poly phone [#2] once installed**
17. Provider must upload or take a picture of **Picture of the screen of Poly phone [#2] once installed**
18. Provider must upload or take a picture of **Picture of the MAC Address sticker on Poly phone [#2]**
19. Provider must upload or take a picture of **Picture of the signed and dated checklist**
20. Provider must check out
    (Code 186 121 184 910 63#)

Post Visit

1. Provider must enter close out notes

Approval of Work

I acknowledge that the work has been satisfactorily completed.

Name	AM / PM Arrival Time
Signature	AM / PM Departure Time
Date	

CONFIDENTIAL!

The following information is confidential and should not be seen by anyone but you, the assigned provider.

Deliverable Uploads

Make sure you collect and upload any required deliverables into the following deliverable categories:

[ ] Misc
[ ] Picture of the full audio-stack (Zone Controller, Music Player, Amp) prior to swapping the Zone Controller
[ ] Picture of the audio stack, showing the connection from the amplifier to the speakers
[ ] Picture of the audio stack, showing the connection from the ORIGINAL Zone Controller to the Amplifier
[ ] Picture of the audio stack, showing the connection from the Mood Media Player to the Amplifier
[ ] Picture of the audio stack, showing the connection from one Amplifier to the other (if applicable)
[ ] Picture of the full audio-stack (Zone Controller, Music Player, Amp) after swapping the Zone Controller
[ ] Picture of Cisco phone [#1] prior to removal
[ ] Picture of the screen of Cisco phone [#1] prior to removal
[ ] Picture of Poly phone [#1] once installed
[ ] Picture of the screen of Poly phone [#1] once installed
[ ] Picture of the MAC Address sticker on Poly phone [#1]
[ ] Picture of Cisco phone [#2] prior to removal
[ ] Picture of the screen of Cisco phone [#2] prior to removal
[ ] Picture of Poly phone [#2] once installed
[ ] Picture of the screen of Poly phone [#2] once installed
[ ] Picture of the MAC Address sticker on Poly phone [#2]
[ ] Picture of the signed and dated checklist

Customer Standard Instructions

For purposes of expectations and consistency with respect to WO processing (approval for payment), Worldlink is formally documenting the process that it will follow so that Field Nation as well as field technicians who are performing work for Worldlink will have a clear understanding of what to expect for the processing of Field Nation Work Orders for approval and payment.

1. Worldlink Expectations:
Worldlink has set a high standard to which its clients have come to expect. Those standards include, but are not limited to:
· Field techs fully understands and comprehends the scope of work within the work order as outlined within either the service description or instruction manual attached to the work order to include the required deliverables for satisfactory closeout of a work order.
· Full understanding of and compliance with Worldlink Policies and Procedures.
· Strict adherence to the work order schedule and escalation if there is any chance for missing the schedule.
o Any lack of clarity on scope of work, policy and procedure, schedule or required deliverables of a work order should be addressed, optimistically, prior to assignment of work order to technician but at least 1 day prior to scheduled visit of the work order. **Addressing this at the time of the scheduled work order is unacceptable.**
· Acknowledgement that the field tech is in no way allowed to discuss scope of work or scheduling matters with Worldlink's client. These subjects should only be discussed with Worldlink.

- ·Field Technicians will NEVER discuss financial, pay or compensation matters with the client. Any discussions about the pay for an accepted work order shall only be discussed with Worldlink. Discussing these matters with either the site contact or with the client in general will be cause for termination from the work order without compensation and consideration for submission for termination from the Field Nation platform.
  · Timely & accurate completion of the scope of work as outlined within either the scope of work 'service description' and/or within an attached instruction manual to the Work Order.
  o Scheduled times that are expressed as precise times on the work order are expected to be adhered to with strict discipline by the field technician. Only a work order that has a 'window' of scheduled time may be considered to have flexibility in the start time for the work order. And the flexibility for a work order with a 'window' is only within the indicated window of time as indicated in the work order.
  · Timely escalation and review of any site issues, additional scope or unforeseen additional costs as encountered by the field technician.
  o Escalation of any issues or additional scope should happen while tech is on site and becomes aware of the increase or change in scope of work. **Completing a changed scope with the expectation that it will be approved later is strictly prohibited** as it is not the decision of the field technician to increase costs of a work order without the express consent of the Worldlink representative that the technician is working with. Further, it is not allowable for the technician to either increase or modify the scope of work without express consent of a Worldlink representative.
  · Timely Submission of agreed to by Worldlink additional costs or reductions (discounts) on the work order.
  o Submission of additional (agreed to by Worldlink) costs or submission of agreed to deductions/refunds as well as any required deliverables are expected to be submitted/attached/uploaded to the work order at the completion of work. Worldlink cannot be expected to honor an expected work order approval turnaround time if the conditions of the work order have not been completely met. These components of the work order, while they may not be a part of the field activity, are as equally important to the Worldlink process as the actual field activity as spelled out by the work order and are expected to be treated as such by the field technician.
  § It is understood by Worldlink that, occasionally, circumstances will present themselves that will not allow for the completion of submissions required to be timely satisfied by the field technician. In the event that this happens, <u>it is incumbent upon the field technician to fully communicate</u> the circumstances to the Worldlink representative so that a clear resetting of the expectations can be executed and agreed to by both the field technician and the Worldlink representative.
  Though this may happen, Worldlink will not own the responsibility of monitoring and proactively contacting the field technician when this condition is in danger of being satisfied. It remains the responsibility of the field technician.
  · Timely closeout of the completed work order by the technician, to include the upload to the work order of any required deliverables as outlined in either the service description of the work order or within the attached document (instruction manual) and moving the work order into a "Work Done" status.
  o Closeout (Moving to "Work Done" status) of the WO shall occur at the completion of the work onsite, thus completing the work order.
  For purposes of expectations and consistency with respect to WO processing (approval for payment), Worldlink is formally documenting the process that it will follow so that Field Nation as well as field technicians who are performing work for Worldlink will have a clear understanding of what to expect for the processing of Field Nation Work Orders for approval and payment.

  2. Worldlink Commitment
  · Worldlink commits the following

o Work Order Approval
§ For work orders that are completed and all expectations of the work order have been satisfied (additional costs & deliverables), Worldlink will approve within 5-7 business days from the completion of work order.
o If for any reason the 5-7 day deadline is missed, the Worldlink rep will notify the technician and Field Nation via a message posting on the work order that the 5-7 day deadline will be missed and advise on what is needed for approval.
o If there are circumstances that will cause the work order to exceed 5 to 7 days for approval after completion, Worldlink will notify the field technician both in writing on the work order and will reach out via phone to the technician to explain the circumstances for the delay and get the technicians acceptance of the delay.

3. Breach of Worldlink Commitment

· If for any reason a work order exceeds the 5-7 day period, has no communication via the work order from Worldlink, the technician should escalate to Field Nation for assistance. Field Nation's path of escalation is 1st to the manager of the work order, 2nd to the supervisor of the manager of the work order. If there has been no reply after attempts to escalate to the work order manager and the supervisor of the work order manager, the Field Nation customer service rep should then escalate to the Field Nation Customer Resolution team and they will attempt to contact the Worldlink management team.
Work orders that explains the delay and the delay has gone beyond the 5 to 7 business days period, should follow the same escalation as outlined above.

- ·At no time is it acceptable for the technician to reach out to the client in an attempt to discuss or resolve payment for a work order. If it is discovered by Worldlink that a technician has reached out to its client for matters pertaining to payment of a work order, the work order will be closed out at zero pay and the technician will be submitted to Field Nation for termination from the Field Nation portal.

Customer Policies & Procedures

Standard Instructions. Additional restrictions and or guidelines will appear in the work orders.

IMPORTANT NOTE: DO NOT ACCEPT THIS WORK ORDER WITHOUT READING:
Technician agrees to warranty their work upon successful completion of the work description.

After acceptance of job, inquiries regarding any and all information in the description or attachments to include but not limited to start time, materials and tools needed etc, MUST be called in to the Worldlink Integration contact that is listed on the work order. This is IN ADDITION to leaving messages on Field Nation system*

IMPORTANT: Under no circumstances are you allowed to call the site contact or work with the site contact while on site to alter or confirm the scheduled arrival date and/or time or the scope of work. You may call to ask questions a customer would ask, such as where to park or which anchor store they are near, but you are not allowed to identify yourself as a tech scheduled to do work for them.
Check in and out via phone as well as on the Work Order itself while at the work site is MANDATORY for payment of any work order; this includes any situation which disallows access to the site or inability to complete the stated scope. Failure to call from the work site at the beginning and end of the job may result in non-payment. Contact information is provided in the work order and in the scope. Digital photographs of work performed are required then they must be sent to the contact on the WO from the jobsite prior to departure as well as uploaded to the work order.
Showing up late to jobsite without a prior call to your support coordinator is unacceptable and will incur a 25% reduction in job payout unless a call prior to being late has been made to your support coordinator with reasonable explanation of why you will be late.

Terms of Agreement
By accepting this work order you are entering into a legally binding contract to perform the services described in such Work Order(s). You agree to provide the Services in a courteous and professional manner and to be on-time for all scheduled appointments. You are obligated to keep all scheduled Service appointments established by Worldlink Integration, cancellation or rescheduling may result in Non Payment. In the event that you must cancel a scheduled appointment or will be late for an appointment you MUST contact the Worldlink Integration team member as designated in the Work Order Details. DO NOT reschedule with the end user customer. You are ONLY allowed call the end user customer when directed to do so by the Worldlink Integration designated support team member.

Since a majority of our clients are retail clients you will be subject to the following policies from our clients:

All persons and companies performing work or supplying materials within a Worldlink Client's store are subject to all reasonable policies of the company, including such policies requiring employees & vendors entering the store to be subject to bag & coat searches by employees and designated representatives of Worldlink's Clients.

By requesting and subsequently being assigned to any work order issued by Worldlink, you relinquish any rights to place any liens against Worldlink, its clients or the property of Worldlink or its clients.

By requesting and subsequently being assigned to any work order issued by Worldlink, you agree that any disagreement pertaining to any work order will be subject to Field Nation mediation/arbitration and you further agree that the decision made by Field Nation as the result of that mediation/arbitration will be binding and that you will not pursue further legal action against Worldlink or any of its clients after a judgment has been issued by Field Nation.

Upon acceptance of this work order, you must conform to the following to obtain payment for services.
1. VERY IMPORTANT!! Check in and check out communications as specified in the Work Order Details are mandatory. Failure to make required communications as specified will result in non-payment.

2. It is the responsibility of the technician to download and print this work order and any additionally provided Scope documentation. All scope documentation is to be read PRIOR to arrival at customer work site and is to be brought to the site. Any questions regarding the scope of work are to be directed to the Support Team member(s) as identified in the Work Order Details and not to the site contact or any client representative.

3. Worldlink Integration support team members must have the ability to reach you while on the work site via mobile telephone.

4. You will present and identify yourself as a technician on behalf of Worldlink Integration. You will not display the logos, vehicles, or uniforms of any other service company while on site on Worldlink Integration behalf.
Personal Appearance/Hygiene:
• Neatly groomed hair and/or facial hair. Personal Hygiene should not be offensive to the general public.
• Attitude:
Should be of a professional nature. Courteous, accommodating and helpful. Not rude, short or condescending. Any personal conflicts with customer or site contacts should be brought to the attention of Worldlink, not worked out on site.
5. In the event that a site contact is not prepared or aware of your arrival, immediately contact the Worldlink Integration support team member as designated in the Work Order Details.

6. Deliverables are required at the time of completion of work order while still on site unless otherwise authorized by the appropriate Worldlink team member. All deliverable requirements will be stated in the Work Order Details and may include but are not limited to: Digital Photographs, Customer Signed Check List/Check out Sheets, Marked Site Drawings/Plans, Site Schematic/Diagram, Cable Test Results, and Various Proof of Functionality Receipts/Reports.
6a. Replaced, extra and not needed equipment disposition:
If you are replacing, have extra or not needed equipment at one of our clients' sites you are required to perform 1 of 3 dispositions in order to relinquish responsibility for the replaced equipment. Specific instruction within the WO will indicate which disposition will be required for the equipment with which you are dealing:

- Leave equipment from site and have site manager/contact sign that they accept responsibility for the equipment left at the site.
- Take the equipment from the site and ship the equipment to the client and provide Worldlink with shipping and tracking information (within the Work Order), once shipment shows tracking tech will be relinquished of responsibility.
- Take equipment from site and ship the equipment to Worldlink and provide Worldlink with shipping and tracking information (within the Work Order), once shipment shows tracking tech will be relinquished of responsibility.
    - If equipment is to be shipped, it is the technicians responsibility to reasonably ensure that the equipment will not be damaged in shipment by providing adequate packing materials as appropriate for the equipment being shipped.
    - Technician will be held financially responsible for any equipment that is not handled according to this outlined procedure and if equipment goes missing or arrived to Worldlink or to the client in a damaged condition, tech will be held financially responsible for the repair of the occurring damage if reasonable measures were not taken to reasonably protect equipment from damage during shipment.

7. By accepting a work order you are stating that you have the equipment required to do the services as described in the Work Order Details, including production of deliverable materials such as cable test results and photographs.

8. Satisfaction Guarantee: you agree to provide Worldlink Integration customers with a satisfaction guarantee. If you fail to fully complete the Services requested, provide quality work and/or reasonably satisfy the customer's request, Worldlink Integration will not consider the Work Order to be completed, which may result in non-payment by Worldlink Integration for services provided.

9. Out of Scope services can ONLY be approved by Worldlink Integration. Requests for additional services that are NOT included in the Work Order Details will not be reimbursed without express prior authorization from a Worldlink Integration representative.
Under no circumstances are you to discuss financial details of this or any other work you are doing for the client. You are only to discuss financial aspects of the work order with your Worldlink Support Coordinator.

10. If upon arrival you find that the work site is not ready for services, you must contact the specified Worldlink Integration Team member, they are the only ones that can release you from the site, prior to leaving the premises for further instructions. Failure to do so will be considered a No Show on your part.

11. Provider is responsible for equipment owned by Worldlink Integration and or its customers while said equipment is in his/her possession and will be held liable for replacement value in the event it becomes damaged or missing. Provider will not be paid until equipment related to the work order has been successfully shipped to its location as stated on the order or Support Manager directive.
12. Provider agrees that if 100% of the assigned scope of work as outlined within the work order is not completed by the assigned provider , that full compensation as outlined within the work order will not be approved by Worldlink. Partial compensation will be factored according to the percentage of scope completed by the provider and provider agrees to adjust, reduce or discount work order to the resulting compensation.

When work order states materials to be supplied by Service Provider, they will be reimbursed using the following pricing schedule below. The listing of this information in not meant to imply that materials will be compensated; the work order description dictates this.
