Full Work Description

SOW:

Special instructions:
Fault: Kiosk printer gets paper jammed in between the printer edge, where the paper cuts and the kiosk door. This is most likely because there is too big of a space. Please confirm if this is the issue. (FYI: Printers were replaced recently and the issue persists). Please eliminate the space, by bringing the printer closer to the Kiosk door. Bring additional longer screws, just in case . Bring extra washers or some other small parts to eliminate the extra space.
Expectation: Receipt printer paper should not jam between the Kiosk and printer. Please eliminate the space in between. We need a tech on site to assist.
- contact Panasonic upon arrival to speak with Tillster support regarding on-site request
- Test Printer printer operation after troubleshooting
